

MEETING OF LEADERSHIP TEAMS. PIOUS SCHOOLS IN ARGENTINA

Sergio Conci. Provincial

From last Friday 17th to Sunday 19th, the annual meeting of the Piarist Province of Argentina's Leadership Teams took place in our house in Mendiolaza, in which rectors, directors and coordinators of all our houses participated with great joy and renewed enthusiasm.

In a fraternal atmosphere of intense work we have been able to analyse the information presented to the Provincial Chapter and the lines of action for the present four-year period. We have also been enriched by the cultural development we have received on the meaning of the true freedom that education provides and the importance of some provincial projects, such as Humanities and Service Learning, which seek an integral formation in piety and letters.

The deep and reflective look at the reality of each house has allowed us to put forward valuable proposals for co-operating ever more effectively with our mission. It has been a favourable time to evaluate what we have achieved during the past year and to begin to outline a plan for institutional improvement that will be able to accompany teachers and students through innovative pedagogical management. We have proposed a management that allows us to authentically strengthen the projects of the Piarist curricular proposal, seeking a clear and enriching identity in each and every one of our Houses.

The liturgy of these days, lived in community, has led us to recognise, once again, that it is Christ who has called us to this most fertile harvest and in Him we are configured as a true Piarist family within the Church. Grateful to God for the fruitful work of these days, we have left the lives of our students, families and teachers before the altar of the Lord. Asking Him to give us the necessary graces to make flesh this year's motto: "Fraternally united for the praise of God and the good of the little ones".
